PROJECTS

IROHUBCRMWEBSITE (LIVE)

- Developed a full-stack Customer Relationship Management website for Irohub Infotech, Kochi. This Website is designed to streamline customer data, track interactions and make it easy for the staffs to nurture leads, manage contacts and close deals.
- The system includes three main modules: Admin, Sub-Admin and Agents. Admin can manage overall settings and users of the website. Sub-Admin can assign leads to each staff agents and also assign tasks. Agents can update the status of the leads and staffs through this website.
- I have used MERN stack domain for this website. Frontend responsive UI was created using React JS and Tailwind CSS. Backend logic was created using Node JS and Express framework and MongoDB for the database.

CLAYWORLD

- Developed a full-stack website during my Masters degree. This is an ecommerce website to buy and sell clay made products like pots, keychains, clay beads etc. through online.
- The system includes four main modules: Admin, Vendors, Shop owners and Customers. Admin can manage overall settings and users of the website. Vendors can sell raw materials for making the product. Shop owners buy raw materials and make completed clay product to sell them and Customers are normal users who buy the clay product.
- For this website, I have used HTML, CSS, JavaScript and Bootstrap for responsive frontend. Backend logic was created using python and DbSqlite for the database.

ONLINE AYURVEDIC MEDICAL SHOP

- Developed a full-stack website during my Bachelors degree. This is an ecommerce website to buy and sell ayurvedic medicines through online.
- The system includes three main modules: Admin, Shops and Customers. Admin can manage overall settings and users of the website. Shops sell the ayurvedic medicines to the customers according to the order and Customers are normal users who buy the medicines.
- For this website, I have used HTML, CSS, JavaScript and Bootstrap for responsive frontend. Backend logic was created using python and MySQL for the database.
